ANALYST INTERPRETATION

- The model currently favours Argentina (84.6%).
- Current score is Argentina 2-0 France; Argentina lead the xG comparison by 1.51.
- Shot volume is 9-0; Recent momentum input favours Argentina.

MODEL VALIDATION CONTEXT

63.0%

Validation Accuracy

0.614

Macro F1

1.835

Log Loss

60'

Checkpoint

Experimental research estimate based on historical StatsBomb match-state snapshots.
These values are model estimates, not guaranteed outcomes and not fully calibrated production probabilities.

PREDICTIVE INTELLIGENCE EVIDENCE

Outcome	Estimated Probability
Argentina Win	84.6%
Draw	7.7%
France Win	7.7%

MATCH-STATE INPUTS

Metric	Argentina	France	Difference
Score	2	0	+2
xG	1.51	0.00	+1.51
Shots	9	0	+9
Pressures	78	90	-12
Recent xG	0.18	0.00	+0.18
Recent Shots	2	0	+2
Momentum	65.4	34.6	+30.8

MODEL VALIDATION CONTEXT

Model Detail	Value
Checkpoint	60'
Calibration Variant	Sigmoid
Validation Accuracy	63.0%
Validation Macro F1	0.614
Validation Log Loss	1.835

INTERPRETATION BOUNDARIES

- Outcome values are experimental research estimates generated from historical StatsBomb match-state snapshots.
- The displayed values are not guaranteed outcomes and should not be described as fully calibrated production probabilities.
- Model quality should be interpreted alongside validation accuracy, macro F1 and log loss rather than from a single match prediction.
- The selected time-aware model uses the latest available checkpoint that does not exceed the current replay minute.
