

Experimental ML Prediction

Borussia Dortmund vs Bayer Leverkusen — 85' checkpoint

Evidence Table

Outcome	Probability %
Borussia Dortmund Win	45.5
Draw	49.1
Bayer Leverkusen Win	5.5

Interpretation Boundaries

- Event data describes recorded actions rather than continuous optical-tracking positions.
- Project-defined indicators such as territory and progressive actions should be interpreted according to their stated methodology.
- Comparison results should be interpreted in tactical and positional context rather than as absolute player or team quality rankings.
- Experimental ML probabilities are research estimates and are not production-grade forecasting probabilities.
