Passing Network & Build-up

Argentina vs France

Argentina

Argentina — Passing Network

Full Match | 560 / 693 completed passes | 80.8% completion

Strongest link: Nicolás Hernán Otamendi → Cristian Gabriel Romero

Showing up to 24 strongest links (minimum 4 completed passes) • Node size ∝ network involvement • Line width ∝ completed pass volume • Positions are average event locations

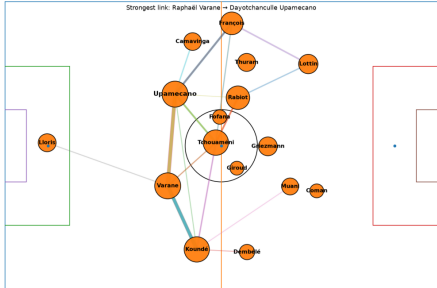

France

France — Passing Network

Full Match | 434 / 570 completed passes | 76.1% completion

Strongest link: Raphaël Varane → Dayotchancelle Upamecano

Showing up to 24 strongest links (minimum 4 completed passes) • Node size ∝ network involvement • Line width ∝ completed pass volume • Positions are average event locations

Argentina	Metric	France
693.0	Passes Attempted	570.0
560.0	Passes Completed	434.0
80.81	Pass Completion %	76.14
18	Strongest Link Passes	16
61.56	Average Network X	61

Analyst Interpretation

• Argentina: top passer Enzo Fernandez; most involved Enzo Fernandez; strongest link Nicolás Hernán Otamendi → Cristian Gabriel Romero.

• France: top passer Aurélien Djani Tchouaméni; most involved Dayotchancelle Upamecano; strongest link Raphaël Varane → Dayotchancelle Upamecano.

Passing-network report | Match ID 3869685 | Node positions are average pass-event locations, not optical-tracking positions

Evidence Table

Team	Passes Attempted	Pass Completion %	Strongest Link Passes	Average Network X
Argentina	693	80.81	18	61.56
France	570	76.14	16	61

Interpretation Boundaries

- Event data describes recorded actions rather than continuous optical-tracking positions.
- Project-defined indicators such as territory and progressive actions should be interpreted according to their stated methodology.
- Comparison results should be interpreted in tactical and positional context rather than as absolute player or team quality rankings.
- Passing-network nodes use average pass-event locations; node size represents network involvement, line width represents completed-pass volume, and only stronger passing links are displayed for readability.
