Interpretation

- Bayer Leverkusen generated the higher cumulative xG (1.36).
- Use the shot map to assess both shot volume and location; larger markers indicate higher xG.

Evidence Table

Team	Shots	xG	Goals	Average xG / Shot
Borussia Dortmund	8	0.55	1	0.07
Bayer Leverkusen	13	1.36	1	0.1

Interpretation Boundaries

- Event data describes recorded actions rather than continuous optical-tracking positions.
- Project-defined indicators such as territory and progressive actions should be interpreted according to their stated methodology.
- Comparison results should be interpreted in tactical and positional context rather than as absolute player or team quality rankings.
